

METROPOLISES AND CITIES IN TRANSFORMATION

Rethinking our future together

8 / 13 NOV 2021 · GUANGZHOU CHINA

GLOBAL MAYORS' FORUM

8 – 13 November

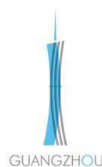

As the global Covid-19 pandemic surges on, those in urban governance face daunting challenges. **Cities and metropolises around the globe should jointly build a closer community with a shared future.** We must face the new challenges posed by the pandemic through mutual assistance, to reduce the effects of the pandemic, and achieve full economic and social recovery as soon as possible.

From November 8th to 13th, 2021, the City of Guangzhou, the Chinese People's Association for Friendship with Foreign Countries (CPAFFC), the World Association of Major Metropolises (Metropolis) and the United Cities and Local Governments (UCLG) will be co-hosting the hybrid XIII Metropolis World Congress, Global Mayors' Forum, and the 5th cycle of Guangzhou International Award for Urban Innovation. These events will **help global cities improve their governance innovation, crisis response capacity, and promote cooperation and exchanges of experience** among cities that will help us defeat the pandemic.

With the theme of ***Moving Forward in Partnership and Modernizing Global Urban Governance***, these events will focus on a slogan that reflects the call of our times, *Metropolises and cities in transformation: rethinking our future together*. This year's events will be attended by world-renowned city leaders, heads of major international organizations, representatives of top multinational companies, and experts in urban innovation. The events will include **information on urban planning and development, provide novel solutions to urban governance, and explore the philosophy of future developments from the following aspects: public health, new infrastructure, poverty alleviation, climate change, how to build a resilient city, and urban renewal.**
